Direction (26-30): Read the following passage carefully and answer the questions that follow.

The mighty Himalayas act as the water tower of the South and Southeast Asian region. More than ten major rivers originate from the Tibetan Autonomous Region of China. And for the past decade, India and China, the two biggest geopolitical forces in the region, have engaged in a hydro-power race to harness this power. The waters that flow from the Himalayas know no borders. These rivers include the Brahmaputra, the Yangtze, the Mekong, the Sutlej, the Indus, the Salween, and the Huang Ho, which is also known as the Yellow River.

The Brahmaputra has a total length of 2,880 kilometres with a total drainage area of 5,73,394 square kilometres. It is shared by China, India, Bhutan and Bangladesh. The river is known as the Yarlung Tsangpo in China, the Siang and the Brahmaputra in India and the Jamuna in Bangladesh. The Brahmaputra is the lifeline for communities living along its banks. The path of the Brahmaputra has sculpted the natural and human landscape of two north-eastern Indian states, Arunachal Pradesh and Assam. The river nourishes the young and fragile ecology of the Eastern Himalayas and the rich diversity of people and languages in this frontier space.

In recent years, the central governments of India and China have decided to tame the Brahmaputra, by building hydropower dams. Among them are the Lower Subansiri Project and the Dibang Valley project. As many as 168 memoranda of understanding have been signed between the Arunachal Pradesh state government and private and public dam-building companies to build medium and large dams in the state.

The legendary 20th century Assamese singer and composer, Bhupen Hazarika, mentions the Brahmaputra river in one of his popular compositions Bistiro Parore. He was influenced by the American standard, Ol' Man River (Show Boat, 1936), sung by African-American artist Paul Leroy Robeson, who was involved in the American civil rights movement. In his song, Hazarika asks the mighty Brahmaputra the reason for its quiet and unbounded flow, amid the suffering and pain of the people living by its banks. Today, the song can be reinterpreted to reflect the great uncertainty and fear among the communities living in the Brahmaputra river basin, exhorting the river to answer back and not keep quietly flowing amid all the dam building.

In upstream Arunachal Pradesh, and downstream communities of Assam and Bangladesh, concern is widespread about plans to construct mega-dams by both China and India and water diversion infrastructure projects by China along the river system. The size and scale of proposed infrastructure developments on this river, and the wider region, is unprecedented in the development history of northeast India. Indigenous communities of the region are worried they will face tremendous social and economic upheaval if the projects go ahead.

This may not go down well with Beijing. India's policy of pursuing hydropower development in Arunachal Pradesh could have a negative impact on bilateral relations. New Delhi is essentially using this critical biodiversity hotspot to legitimise its sovereignty claims over Arunachal Pradesh by building mega hydroelectricity projects.

The Indian government's hydropower obsession has led to great fear among local communities in Arunachal Pradesh and Assam, for the first time significantly overriding existing concerns about upstream dam building projects by China. Recently, local people have taken to the streets in large-scale protests to voice their dissatisfaction.

The way forward must be to highlight the Himalayan environment as an area of cooperation between all the South and Southeast Asian countries that share the transborder water resources in the region. The only way to understand the Brahmaputra better is through a mix of modern research methods and traditional community-based knowledge systems. This approach should be central to any dialogue between and within the countries served by the river. An emphasis on multilateral cooperation will **dispel** the prevailing sense of conflict on this crucial river. The Brahmaputra, meanwhile, meanders along ceaselessly, shifting between its moods of ferocious rampage and eternal quiet flow.

Refer to the lines: "The legendary 20th century Assamese singer and composer, Bhupen Hazarika, mentions the Brahmaputra river in one of his popular compositions Bistirno Parore. He was influenced by the American standard, Ol' Man River (Show Boat, 1936), sung by African-American artist Paul Leroy Robeson, who was involved in the American civil rights movement." These lines confirm A as true.
B and C are not mentioned in the passage.
Refer to the lines: "In his song, Hazarika asks the mighty Brahmaputra the reason for its quiet and unbounded flow, amid the suffering and pain of the people living by its banks. Today, the song can be reinterpreted to reflect the great uncertainty and fear among the communities living in the Brahmaputra river basin, exhorting the river to answer back and not keep quietly flowing amid all the dam building." These lines confirm D as false.

Quantitative Aptitude

31. **Answer: (D)**
Profit share of Peter = $8000 - 4500 = ₹3,500$
So, ratio of profit shares of Petra and Peter, respectively = $4500:3500 = 9:7$
Let the number of months for which Peter invested his sum = 'k' months
Then, $(3300 \times 12)/(4400 \times k) = 9/7$
Or, $39600 \times 7 = 4400k \times 9$
Or, $63 = 9k$
Or, $k = (63/9) = 7$
So, number of months after which Peter joined the business = $12 - 7 = 5$ months.
32. **Answer: (D)**
Annual expenditure of Rohan = $(900 \times 4) + (1500 \times 8) = 3600 + 12000 = ₹15600$
Annual income of Rohan = $15600 + 6000 = ₹21600$
Required average = $21600/12 = ₹1800$
33. **Answer: (D)**
Let the present ages of 'A' and 'B' be '4x' years and '5x' years, respectively.
ATQ;
 $4x + 14 + 5x + 14 = 100$
Or, $9x = 72$
Or, $x = 8$
So the present age of 'A' = $4 \times 8 = 32$ years
34. **Answer: (C)**
Income of Sourav in March = $\{14000/(1 - 0.72)\}$
= ₹50000
Savings of Sourav in April = $14000 \times (120/100)$
= ₹16800
So, expenses of Sourav in April = $50000 - 16800 = ₹33200$
Therefore, percentage of his income spent by Sourav in April = $(33200/50000) \times 100 = 66.4\%$
35. **Answer: (B)**
Let the cost price of a belt = ₹'A'
Let the cost price of purse = ₹'B'
According to the question,
 $2A + 1B = 1960$ (1)
 $5A + 2B = 4520$ (2)
On solving equation (1) and (2), we get
Cost price of 1 belt = 'A' = ₹600

36. So, required profit earned = $600 \times (15/100) = ₹90$
Answer: (D)
 Let the cost price of the item = ₹'100x'
 Marked price of the item = $1.8 \times 100x = ₹180x$
 Discount given on the item = $(2/9) \times 180x = ₹40x$
 Selling price of the item = $180x - 40x = ₹140x$
 Required profit percentage = $\{(140x - 100x)/100x\} \times 100 = (40x/100x) \times 100 = 0.4 \times 100 = 40\%$
37. **Answer: (B)**
 Total interest earned in 4 years = $\{(1200 \times 4 \times 20)/100\} + \{(800 \times 4 \times 25)/100\} = 960 + 800 = ₹1760$
 So, total amount received after four years = $2000 + 1760 = ₹3760$
38. **Answer: (C)**
 Quantity of milk in the initial mixture = $480 \times \{5/(5+7)\} = 480 \times (5/12) = 200$ litres
 Quantity of water in the initial mixture = $480 \times \{7/(5+7)\} = 480 \times (7/12) = 280$ litres
 According to the question,
 $\{(200+x)/280\} = 6/7$
 Or, $1400 + 7x = 1680$
 Or, $7x = 1680 - 1400$
 Or, $7x = 280$
 Or, $x = 40$
39. **Answer: (B)**
 Let the total work = 210 units {L.C.M of 21 and 10}
 Then, efficiency of 'P' alone = $(210/21) = 10$ units/day
 Efficiency of 'P' and 'Q' together = $(210/10) = 21$ units/day
 So, efficiency of 'Q' alone = $21 - 10 = 11$ units/days
 So, work done by 'Q' alone in 15 days = $11 \times 15 = 165$ units
 So, fraction of the work completed = $(165/210) = (11/14)$
40. **Answer: (D)**
 Let the distance between point 'A' and 'B' be 'd' km.
 Speed of boat in still water = 12 km/h
 Speed of stream = $(12/3) = 4$ km/h
 ATQ;
 $\{d/(12-4)\} + \{d/(12+4)\} = 22.5$
 Or, $(d/8) + (d/16) = 22.5$
 Or, $2d + d = 360$
 Or, $d = 120$
 Therefore, the distance between point 'A' and 'B' is 120 km.
41. **Answer: (B)**
 Perimeter of square shaped plot = 120 metres
 Let length of each side of the square shaped plot be 'a' metres.
 So, $4a = 120$
 Or, $a = 30$
 Area of square shaped plot = $30 \times 30 = 900 \text{ m}^2$
 Area of rectangular plot = $1.60 \times 900 = 1440 \text{ m}^2$

51. **Answer: (D)**
 $1086 + 7 \times 1 = 1093$
 $1093 + 7 \times 3 = 1114$
 $1114 + 7 \times 5 = 1149$
 $1149 + 7 \times 7 = 1198$
 $1198 + 7 \times 9 = 1261$
 Therefore, 1198 should come in place of 1197
52. **Answer: (B)**
 $120 - 4 \times 1 = 116$
 $116 - 4 \times 3 = 104$
 $104 - 4 \times 5 = 84$
 $84 - 4 \times 7 = 56$
 $56 - 4 \times 9 = 20$
 Therefore, 56 should come in place of 52.
53. **Answer: (D)**
 $96 \times (3/2) = 144$
 $144 \times (3/2) = 216$
 $216 \times (3/2) = 324$
 $324 \times (3/2) = 486$
 $486 \times (3/2) = 729$
 Therefore, 324 should come in place of 320.

 Or, $x^2 - 8x - 4x - 32 = 0$
 Or, $x(x - 8) - 4(x - 8) = 0$
 Or, $(x - 4)(x - 8) = 0$
 So, $x = 4$ or $x = 8$
 From II:
 $y^2 + 45 = 18y$
 Or, $y^2 - 18y + 45 = 0$
 Or, $y^2 - 15y - 3y + 45 = 0$
 Or, $y(y - 15) - 3(y - 15) = 0$
 Or, $(y - 15)(y - 3) = 0$
 So, $y = 15$ or $y = 3$
- | x | Relationship | y |
|---|--------------|----|
| 4 | > | 3 |
| 4 | < | 15 |
| 8 | > | 3 |
| 8 | < | 15 |
- So, the relationship cannot be established.
55. **Answer: (D)**
 From I:
 $4x^2 + 24x + 35 = 0$
 $4x^2 + 14x + 10x + 35 = 0$
 $2x(2x + 7) + 5(2x + 7) = 0$

$$(2x + 5)(2x + 7) = 0$$

$$x = -5/2, -7/2$$

From II:

$$8y^2 + 26y + 15 = 0$$

$$8y^2 + 20y + 6y + 15 = 0$$

$$4y(2y + 5) + 3(2y + 5) = 0$$

$$(4y + 3)(2y + 5) = 0$$

$$y = -3/4, -5/2$$

x	Relation	y
-5/2	<	-3/4
-5/2	=	-5/2
-7/2	<	-3/4
-7/2	<	-5/2

So, $x \leq y$

Number of people who like only hair gel

$$= 110 - 45 = 65$$

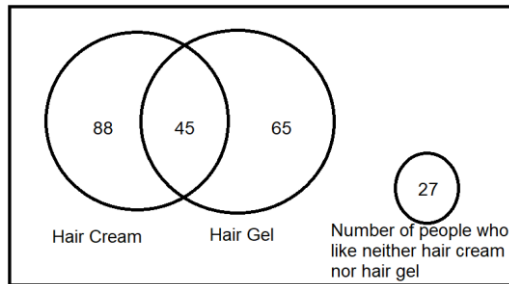

So, number of people who like only hair cream

$$= 65 + 23 = 88$$

Number of people who like both hair gel and hair cream = 45

Number of people who liked neither hair cream nor hair gel = 27

$$\text{So, total number of people surveyed} = 65 + 88 + 45 + 27 = 225$$

56. **Answer: (D)**

Total number of people who were surveyed = 225

57. **Answer: (B)**

Number of females who like only hair cream

$$= 88 \times (5/8) = 55$$

58. **Answer: (D)**

$$\text{Required sum} = 88 + 65 = 153$$

59. **Answer: (A)**

$$\text{Required percentage} = (27/45) \times 100 = 60\%$$

60. **Answer: (B)**

$$\text{Required difference} = 110 - 88 = 22$$

D	6000	2800	2100	1100
E	10000	6000	3000	1000

61. **Answer: (C)**

Number of roses sold by shop 'F' = $(3/5) \times 2 \times 1250$

$$= (3/5) \times 2500 = 1500$$

$$\text{Required difference} = 1500 - 1200 = 300$$

62. **Answer: (A)**

$$\text{Required difference} = 2300 - 2200 = 100$$

63. **Answer: (B)**

$$\text{Desired ratio} = 4000:2500:2500 = 8:5:5$$

64. **Answer: (D)**

$$\text{Required percentage} = \{(6000)/(1500 + 2500 + 4000)\} \times 100 = (6000/8000) \times 100 = 0.75 \times 100 = 75\%$$

65. **Answer: (C)**

Direction (26-30): Read the following passage carefully and answer the questions that follow.

The mighty Himalayas act as the water tower of the South and Southeast Asian region. More than ten major rivers originate from the Tibetan Autonomous Region of China. And for the past decade, India and China, the two biggest geopolitical forces in the region, have engaged in a hydro-power race to harness this power. The waters that flow from the Himalayas know no borders. These rivers include the Brahmaputra, the Yangtze, the Mekong, the Sutlej, the Indus, the Salween, and the Huang Ho, which is also known as the Yellow River.

The Brahmaputra has a total length of 2,880 kilometres with a total drainage area of 5,73,394 square kilometres. It is shared by China, India, Bhutan and Bangladesh. The river is known as the Yarlung Tsangpo in China, the Siang and the Brahmaputra in India and the Jamuna in Bangladesh. The Brahmaputra is the lifeline for communities living along its banks. The path of the Brahmaputra has sculpted the natural and human landscape of two north-eastern Indian states, Arunachal Pradesh and Assam. The river nourishes the young and fragile ecology of the Eastern Himalayas and the rich diversity of people and languages in this frontier space.

In recent years, the central governments of India and China have decided to tame the Brahmaputra, by building hydropower dams. Among them are the Lower Subansiri Project and the Dibang Valley project. As many as 168 memoranda of understanding have been signed between the Arunachal Pradesh state government and private and public dam-building companies to build medium and large dams in the state.

The legendary 20th century Assamese singer and composer, Bhupen Hazarika, mentions the Brahmaputra river in one of his popular compositions Bistirno Parore. He was influenced by the American standard, Ol' Man River (Show Boat, 1936), sung by African-American artist Paul Leroy Robeson, who was involved in the American civil rights movement. In his song, Hazarika asks the mighty Brahmaputra the reason for its quiet and unbounded flow, amid the suffering and pain of the people living by its banks. Today, the song can be reinterpreted to reflect the great uncertainty and fear among the communities living in the Brahmaputra river basin, exhorting the river to answer back and not keep quietly flowing amid all the dam building.

In upstream Arunachal Pradesh, and downstream communities of Assam and Bangladesh, concern is widespread about plans to construct mega-dams by both China and India and water diversion infrastructure projects by China along the river system. The size and scale of proposed infrastructure developments on this river, and the wider region, is unprecedented in the development history of northeast India. Indigenous communities of the region are worried they will face tremendous social and economic upheaval if the projects go ahead.

This may not go down well with Beijing. India's policy of pursuing hydropower development in Arunachal Pradesh could have a negative impact on bilateral relations. New Delhi is essentially using this critical biodiversity hotspot to legitimise its sovereignty claims over Arunachal Pradesh by building mega hydroelectricity projects.

The Indian government's hydropower obsession has led to great fear among local communities in Arunachal Pradesh and Assam, for the first time significantly overriding existing concerns about upstream dam building projects by China. Recently, local people have taken to the streets in large-scale protests to voice their dissatisfaction.

The way forward must be to highlight the Himalayan environment as an area of cooperation between all the South and Southeast Asian countries that share the transborder water resources in the region. The only way to understand the Brahmaputra better is through a mix of modern research methods and traditional community-based knowledge systems. This approach should be central to any dialogue between and within the countries served by the river. An emphasis on multilateral cooperation will **dispel** the prevailing sense of conflict on this crucial river. The Brahmaputra, meanwhile, meanders along ceaselessly, shifting between its moods of ferocious rampage and eternal quiet flow.

He was influenced by the American standard, Ol' Man River (Show Boat, 1936), sung by African-American artist Paul Leroy Robeson, who was involved in the American civil rights movement." These lines confirm A as true. B and C are not mentioned in the passage.

Refer to the lines: "In his song, Hazarika asks the mighty Brahmaputra the reason for its quiet and unbounded flow, amid the suffering and pain of the people living by its banks. Today, the song can be reinterpreted to reflect the great uncertainty and fear among the communities living in the Brahmaputra river basin, exhorting the river to answer back and not keep quietly flowing amid all the dam building." These lines confirm D as false.

27. **Answer: (B)**
Refer to the lines: "In upstream Arunachal Pradesh, and downstream communities of Assam and Bangladesh, concern is widespread about plans to construct mega-dams by both China and India and water diversion infrastructure projects by China along the river system. along its banks. The path of the Brahmaputra has sculpted the natural and human landscape of two north-eastern Indian states, Arunachal Pradesh and Assam. The river nourishes the young and fragile ecology of the Eastern Himalayas and the rich diversity of people and languages in this frontier space." These lines confirm A, B and C as true.

Quantitative Aptitude

31. **Answer: (D)**
पीटर का लाभ हिस्सा = $8000 - 4500 = ₹3,500$
तो, पीटर और पीटर के लाभ शेयरों का अनुपात, क्रमशः
= $4500:3500 = 9:7$
माना कि जितने महीनों के लिए पीटर ने अपनी राशि का निवेश किया = 'k' महीने
तब, $(3300 \times 12)/(4400 \times k) = 9/7$
या, $39600 \times 7 = 4400k \times 9$
या, $63 = 9k$
या, $k = (63/9) = 7$
अतः, पीटर के व्यवसाय में शामिल होने के महीनों की संख्या = $12 - 7 = 5$ महीने

32. **Answer: (D)**
रोहन का वार्षिक व्यय = $(900 \times 4) + (1500 \times 8)$
= $3600 + 12000 = ₹15600$
रोहन की वार्षिक आय = $15600 + 6000 = ₹21600$
अभीष्ट औसत = $21600/12 = ₹1800$

33. **Answer: (D)**
माना 'A' और 'B' की वर्तमान आयु क्रमशः '4x' वर्ष और '5x' वर्ष है।
प्रश्नानुसार;
 $4x + 14 + 5x + 14 = 100$
या, $9x = 72$
या, $x = 8$
अतः 'A' की वर्तमान आयु = $4 \times 8 = 32$ वर्ष

34. **Answer: (C)**
मार्च में सौरव की आय = $\{14000/(1 - 0.72)\}$
= ₹50000
अप्रैल में सौरव की बचत = $14000 \times (120/100)$
= ₹16800
तो, अप्रैल में सौरव का खर्च = $50000 - 16800$
= ₹33200

इसलिए, सौरव द्वारा अप्रैल में खर्च की गई उसकी आय का प्रतिशत = $(33200/500000) \times 100 = 66.4\%$

35. **Answer: (B)**

माना एक बेल्ट का क्रय मूल्य = ₹'A'

माना उसे पर्स का मूल्य = ₹'B'

प्रश्न के अनुसार,

$$2A + 1B = 1960 \dots (1) \quad 5A + 2B = 4520 \dots (2)$$

समीकरण (1) और (2) को हल करने पर, हम प्राप्त करते हैं

$$1 \text{ बेल्ट का क्रय मूल्य} = 'A' = ₹600$$

$$\text{अतः अर्जित अपेक्षित लाभ} = 600 \times (15/100) = ₹90$$

36. **Answer: (D)**

माना वस्तु का क्रय मूल्य = ₹'100x'

$$\text{वस्तु का अंकित मूल्य} = 1.8 \times 100x = ₹180x$$

$$\text{वस्तु पर दी गई छूट} = (2/9) \times 180x = ₹40x$$

$$\text{वस्तु का विक्रय मूल्य} = 180x - 40x = ₹140x$$

$$\text{आवश्यक लाभ प्रतिशत} = \{(140x - 100x)/100x\} \times 100 = (40x/100x) \times 100 = 0.4 \times 100 = 40\%$$

37. **Answer: (B)**

$$4 \text{ वर्षों में अर्जित कुल ब्याज} = \{(1200 \times 4 \times 20)/100\}$$

$$+ \{(800 \times 4 \times 25)/100\} = 960 + 800 = ₹1,760$$

$$\text{तो, चार वर्षों के बाद प्राप्त कुल राशि} = 2000 + 1760$$

$$= ₹3,760$$

38. **Answer: (C)**

$$\text{प्रारंभिक मिश्रण में दूध की मात्रा} = 480 \times \{5/(5 + 7)\}$$

$$= 480 \times (5/12) = 200 \text{ लीटर}$$

$$\text{प्रारंभिक मिश्रण में पानी की मात्रा} = 480 \times \{7/(5 + 7)\}$$

$$= 480 \times (7/12) = 280 \text{ लीटर}$$

प्रश्न के अनुसार,

$$\{(200 + x)/280\} = 6/7$$

$$\text{या, } 1400 + 7x = 1680$$

$$\text{या, } 7x = 1680 - 1400$$

$$\text{या, } 7x = 280$$

$$\text{या, } x = 40$$

39. **Answer: (B)**

माना कुल कार्य = 210 इकाई {21 और 10 का L.C.M}

तब, अकेले 'P' की दक्षता = $(210/21) = 10$ इकाई/दिन

'P' और 'Q' की एक साथ दक्षता = $(210/10)$

$$= 21 \text{ यूनिट/दिन}$$

अतः अकेले 'Q' की दक्षता = $21 - 10 = 11$ इकाई/दिन

अतः 'Q' द्वारा अकेले 15 दिनों में किया गया कार्य

$$= 11 \times 15 = 165 \text{ इकाई}$$

$$\text{तो, कार्य का अंश पूरा हुआ} = (165/210) = (11/14)$$

40. **Answer: (D)**

मान लीजिए कि बिंदु 'A' और 'B' के बीच की दूरी 'd' किमी है।

शांत जल में नाव की गति = 12 किमी/घंटा

धारा की गति = $(12/3) = 4$ किमी/घंटा

ATQ;

$$\{d/(12 - 4)\} + \{d/(12 + 4)\} = 22.5$$

$$\text{या, } (d/8) + (d/16) = 22.5$$

$$\text{या, } 2d + d = 360$$

$$\text{या, } d = 120$$

इसलिए, बिंदु 'A' और 'B' के बीच की दूरी 120 किमी है।

41. **Answer: (B)**

वर्गाकार भूखंड का परिमाण = 120 मीटर

माना वर्गाकार प्लॉट की प्रत्येक भुजा की लंबाई 'a' मीटर है।

$$\text{अतः, } 4a = 120$$

$$\text{या, } a = 30$$

$$\text{वर्गाकार भूखंड का क्षेत्रफल} = 30 \times 30 = 900 \text{ मी}^2$$

$$\text{आयताकार भूखंड का क्षेत्रफल} = 1.60 \times 900$$

$$= 1440 \text{ मी}^2$$

42. **Answer: (D)**

$$12 \times ? = 420$$

$$? = (420/12)$$

$$? = 35$$

47. **Answer: (A)**

$$? = 509$$

51. **Answer: (D)**

$$1086 + 7 \times 1 = 1093$$

$$1093 + 7 \times 3 = 1114$$

$$1114 + 7 \times 5 = 1149$$

$$1149 + 7 \times 7 = 1198$$

$$1198 + 7 \times 9 = 1261$$

अतः 1197 के स्थान पर 1198 आना चाहिए

52. **Answer: (B)**

$$120 - 4 \times 1 = 116$$

$$116 - 4 \times 3 = 104$$

$$104 - 4 \times 5 = 84$$

$$84 - 4 \times 7 = 56$$

$$56 - 4 \times 9 = 20$$

इसलिए 52 के स्थान पर 56 आना चाहिए।

53. **Answer: (D)**

$$96 \times (3/2) = 144$$

$$144 \times (3/2) = 216$$

$$216 \times (3/2) = 324$$

$$324 \times (3/2) = 486$$

$$486 \times (3/2) = 729$$

अतः 320 के स्थान पर 324 आना चाहिए।

54. **Answer: (C)**

$$\text{या, } x^2 - 12x - 32 = 0$$

$$\text{या, } x^2 - 8x - 4x - 32 = 0$$

$$\text{या, } x(x - 8) - 4(x - 8) = 0$$

96. **Answer: (B)** दिया गया:

$A > B \geq C ? D = E < F$

विकल्प (a): '?' को > से बदलना

$A > B \geq C > D = E < F$

यहाँ, $A > D$ सत्य है लेकिन $F > C$ सत्य नहीं है क्योंकि F और C के बीच संबंध निर्धारित नहीं किया जा सकता है।

विकल्प (b): '?' के स्थान पर =

$A > B \geq C = D = E < F$

यहाँ, $A > D$ सत्य है और $F > C$ सत्य है।

विकल्प (c): '?' को . के साथ बदलना

$A > B \geq C \leq D = E < F$

यहाँ, $A > D$ सत्य नहीं है क्योंकि A और D के बीच संबंध निर्धारित नहीं किया जा सकता है और $F > C$ सत्य है।

विकल्प (d): '?' को . के साथ बदलना

$A > B \geq C \geq D = E < F$

यहाँ, $A > D$ सत्य है लेकिन $F > C$ सत्य नहीं है क्योंकि F और C के बीच संबंध निर्धारित नहीं किया जा सकता है।

97. **Answer: (B)** दिया गया है:

विकल्प d को छोड़कर दूसरी कार पहली कार के उत्तर-पूर्व में है।

100. **Answer: (C)**

दिया गया कथन: $Q = C > R \geq P \geq D$; $M \geq Z > P = S$ संयोजन करने पर, हम प्राप्त करते हैं,

$M \geq Z > P = S \leq R < C = Q$; $M \geq Z > P = S \geq D$

निष्कर्ष:

I. $S > D$: असत्य (जैसे, $M \geq Z > P = S \geq D$, अतः, $S \geq D$)

II. $M \geq C$: असत्य (जैसे, $M \geq Z > P = S \leq R < C$, इसलिए, C और M के बीच संबंध निर्धारित नहीं किया जा सकता है)

III. $D < Z$: सत्य (जैसे, $M \geq Z > P = S \geq D$, अतः, $D < Z$)
